PROFESSIONAL SUMMARY

AI Engineer and Deep Learning Researcher with 4+ years of experience developing production-grade intelligent systems across machine learning domains. Proven expertise in NLP, computer vision, reinforcement learning, and model fine-tuning. Skilled in TensorFlow, PyTorch, and transformer architectures. Currently pursuing a B.Sc. in Mechatronics Engineering with a specialization in robotic software development and AI integration.

WORK EXPERIENCE

Data Scientist Jun 2021 – Present

Upwork (Freelance)

- Developed custom machine learning models tailored to client-specific business challenges, translating complex data into actionable insights.
- Implemented advanced data preprocessing pipelines to handle messy datasets, boosting model accuracy and reliability.
- Participated in regular code reviews enforcing best practices, reducing project delivery time and improving maintainability.

AI Trainer & Machine Learning Engineer Jan 2023 – Present

Outlier AI

- Collaborated with data scientists to refine AI training models and methodologies, increasing model accuracy by 15% over 6 months.
- Designed and curated training materials to simplify complex AI concepts, improving team knowledge across varying technical backgrounds.
- Led interactive workshops on AI functionalities, fostering a culture of continuous learning and best practice adoption.

NLP Engineer (Internship) Aug 2025

NTI

- Built NLP models for text classification and sentiment analysis, improving insight accuracy from textual data.
- Applied machine learning for topic modeling to extract nuanced meaning from user feedback.
- Performed data preprocessing and feature extraction from large-scale text corpora.
- Achieved an evaluation score of 97.8% during the internship.

Computer Vision Engineer (Internship) Jul 2025 – Sep 2025

NAID

- Developed computer vision algorithms for real-time image processing applications.
- Designed and implemented end-to-end data pipelines for training and validating CV models.
- Conducted model performance experiments to drive object detection improvements.

AI Engineer (Internship) Aug 2025

ITI

- Developed ML models improving data analysis and prediction accuracy for production use cases.
- Designed NLP algorithms to enhance user interaction experiences.
- Implemented data preprocessing techniques ensuring high-quality model input.
- Researched emerging AI technologies to inform project roadmap decisions.

EDUCATION

B.Sc. in Mechatronics Engineering Oct 2022 – Feb 2027

Egypt-Japan University of Science and Technology (E-JUST) — New Burg El-Arab, Egypt

- Specialization in robotic software development and artificial intelligence; thesis on modular control system for robotic arms, improving precision by 15% vs. traditional methods.
- Active member of the Mechatronics Club; led team in national robotics competitions.

TECHNICAL SKILLS

Machine Learning: Python, TensorFlow, PyTorch, Scikit-learn, Deep Learning, Reinforcement Learning

NLP: Transformers, BERT, GPT, Seq2Seq, Sentiment Analysis, Topic Modeling, TrOCR, OCR

Computer Vision: CNNs, ViT, Diffusion Models, Real-time Image Processing, Object Detection

Data & Engineering: Data Preprocessing, Feature Engineering, Statistical Analysis, Regression Analysis

Other: C++ Programming, Research Methodologies, Software Development, Git, AWS

Soft Skills: Critical Thinking, Problem Solving, Public Speaking, Teamwork

CERTIFICATIONS

- Data Scientist — DataCamp
- Machine Learning Scientist — DataCamp
- Data Scientist — IBM
- AWS AI Engineer
- Generative AI Engineer — ITI / NVIDIA
- NLP Engineer — NTI
- Computer Vision Engineer — NAID

KEY PROJECTS

- **Qalam-Net V2:** Arabic OCR system — state-of-the-art model for Arabic printed text recognition.
- **Qalam-Net:** Arabic Handwritten OCR model with 253+ HuggingFace downloads.
- **TrOCR 0.3B:** Fine-tuned TrOCR model (0.3B parameters) for document text recognition.
- **LinguaFlow:** Neural Machine Translation system with 318+ HuggingFace downloads.
- **Image-Text-to-Text:** Multimodal model pipeline with 70+ downloads on HuggingFace.
- **Qwen Medical Chatbot:** Fine-tuned LLM for Medical Question Answering using Qwen architecture.
- **Text Generation:** Custom language model for domain-specific text generation tasks.

ACHIEVEMENTS & AWARDS

- ECPC Finalist — Ranked 61st out of 600+ teams in the Egyptian Collegiate Programming Contest.

LANGUAGES

English (Fluent) | Arabic (Native) | Japanese (Proficient)
